

**Reference:** ACOUSTIC-LOMA6  
**Name:** LOMA slatted acoustic panels for wall application

Transform walls into acoustic solutions. Panels made of a 9 mm thick PET board and rectangular MDF slats combine design and functionality. Thanks to their modular system, they adapt to the size you need, providing exceptional acoustics for environments such as offices and collaborative areas.

#### **Main materials**

Back panel made of 9 mm thick PET material.  
Slats made of 12 mm thick MDF with PVC surface coating

#### **Main features**

Acoustic panels that are easy to install.  
Mounting system depending on the final application. Please contact your usual installer.  
Delivered in boxes of 4 panels each.
